DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because all instances of "configured to" in the claim should be deleted to make the claim positive. Language such as "adapted to/for", configured to/for", or arranged to/for" (or similar phrases such as "enabled to", "capable of", etc.) is not considered positive recitation per MPEP 2106.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Resuta (US 2004/0008824).

Resuta discloses a telecommunication network comprising:

a switch (communication gateway 101 in FIG. 1 and FIG. 2) for handling a VOIP call in connection with the VOIP call (Paragraph 0014), a series of signaling messages (events occurring at a subscriber telephone 107, see Paragraph 0022);

a monitoring system (a call agent simulator 160 in FIG. 1, see Paragraph 0020 and 0021)) coupled to the switch identifying service deficiency by examining the signaling message handled by the switch in connection with the VOIP call in chronological order (FIG. 4 and paragraph 0038).

Allowable Subject Matter

4. Claims 9-20 are allowed.
5. Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. The following is a statement of reasons for the indication of allowable subject matter.

The prior art of record fails to teach a switching having a plurality of call processors, each coupled to corresponding signaling message files for maintaining the selected ones of series of signaling messages as recited in claim 2.

The prior art of record fails to teach generating the warning message for the service provider to initiate corrective action to proactively rectify the identified service deficiency for the customer as recited in claim 9.
